DETAILED ACTION

Response to Arguments

1. The cancellation of claim 21 is noted which therefore renders moot all previous prior art rejections.
2. An updated prior art search has yielded no additional, as per prior art rejection purposes, results.

Allowable Subject Matter

3. Claims 1, 3, 5-11, 13, 15-20, 24-30 and 37 are allowed.

The following is an examiner's statement of reasons for allowance:

In reference to claim 1, the prior art of record does not explicitly disclose a computer readable medium having computer executable instructions embodied therefor for storing a data structure defining a window for drawing on a desktop displayed on a display device, the window comprising a first data field storing base content object properties for a base content, the field subdivided into a portion storing properties comprising base geometry and another portion to store properties comprising a plurality of vertices defining a mesh, in combination with the further limitations of claim 1.

In reference to claims 3 and 5-10, these claims depend upon allowable claim 1 and are therefore also deemed allowable.

In reference to claim 11, the prior art of record does not explicitly disclose a processing system having a memory storing window properties defining a window, the memory storing base

content object properties and one or more primary content objects, storing properties comprising base geometry, the base geometry property comprising a plurality of vertices defining a mesh, in combination with the further limitations of claim 11.

In reference to claims 13, 15-20 and 37, these claims depend upon allowable claim 11 and are therefore also deemed allowable.

In reference to claim 24, the prior art of record does not explicitly disclose a method of displaying a window in a graphical user interface of a shell of an operating system including receiving window information from an instance of an application program and rendering a window on a display associated with a computing device having a base object defined by a mesh, content margins, extent and material with the material comprising an ambient, a diffusive and a specular color, in combination with the further limitations of claim 24.

In reference to claim 25, claim 25 depends upon allowable claim 24 and is therefore also deemed allowable.

In reference to claim 26, the prior art of record does not explicitly disclose a method of displaying a window in a graphical user interface of a shell of an operating system including receiving window information from an instance of an application program and rendering a window on a display associated with a computing device having a base object defined by a mesh, content margins, extent and material with the material comprising a reflection scalar and a refraction index, in combination with the further limitations of claim 26.

In reference to claim 27, the prior art of record does not explicitly disclose a method of displaying a window in a graphical user interface of a shell of an operating system including receiving window information from an instance of an application program and rendering a

window on a display associated with a computing device having a base object defined by a mesh, content margins, extent and material with the material comprising a diffuse texture and a bump texture, in combination with the further limitations of claim 27.

In reference to claim 28, the prior art of record does not explicitly disclose a method of displaying a window in a graphical user interface of a shell of an operating system including receiving window information from an instance of an application program and rendering a window on a display associated with a computing device having a base object defined by a mesh, content margins, extent and material with the rendering based on a content geometry and a content surface for each primary content object, in combination with the further limitations of claim 28.

In reference to claim 29, claim 29 depends upon allowable claim 28 and is therefore also deemed allowable.

In reference to claim 30, the prior art of record does not explicitly disclose a method of displaying a window in a graphical user interface of a shell of an operating system including receiving window information from an instance of an application program and rendering a window on a display associated with a computing device having a base object defined by a mesh, content margins, extent and material, dividing the mesh into three regions per mesh dimension and for each region maintaining offsets of mesh vertices in any dimension using a bounding box of the window, in combination with the further limitations of claim 30.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
